(54) Title: **IMAGE-SIZE DEPENDENT FACIAL CARICATUREING**

(57) Abstract: The present invention applies prior art findings with regards to increased recognisance of caricatured images by providing a method and system which provide for the level of caricaturing to be applied to an image to be set in dependence on the intended size of the caricature image. Preferably, the caricature level is set as a generally inverse function of the image size, such that the smaller the image the greater the level of the caricaturing that is applied. In such a case increased recognisance of subjects represented in smaller images may result.
